## Can't Ride With Us? We Still Need Your Help!

Last year over 400 children came to the Center for services, support and protection. All the Center's services - forensic interviews, comprehensive child sexual abuse medical examinations, crisis intervention, counseling and case management services just to name a few - are provided at no expense to children and their families. The Center is designed to be the one child-friendly and safe place in the region for children and their non-offending family members/caregivers to go and work with the various professionals involved in the process. Working through a Multidisciplinary Team system helps us track children, provide services and follow their cases more efficiently, which helps minimize additional trauma throughout a very complicated process. We are committed to being there when they need us - and we need your help!
